The market opened steady at a gain of 1 to 11 points and sold up to a level about 10g16 points over the close of the preceding day under covering based on expectations of a very buillish Government report next Friday, further support by the New Orleans bull contingent and firm cables. In some quarters it was said that this selling was in reality for the bull pool and on the downward turn selling became more or less general, with the market probably the most active of the session. This forced prices off from 12 to 22 points from the best of the merning on the active months, while July sold down to 12.55c, a less of 5 points, Later the market was stealled again by a renewal of bull support, but during the balance of the session ruled more or less irregular and less artive. The close was barely steady net 5 points higher to 4 points lower. Sales were estimated at 309,000 bales. Private crop advices received to-day were more favorable and climatic conditions were nearly perfect, but sentiment continues very nervous and unsettied with popular opinion, indicating the probability of further broad and violent fluctuations.
